President's message

I am most grateful to IAAF Statistical & Documentation Senior Manager Ottavio Castellini and external IAAF statistical consultants Carlos Fernandez Canet, Felix Capilla and Francisco Javier Ascorbe, for their hard work and diligence in compiling the latest edition of the IAAF World Lists.

This statistical annual presents the definitive official record of a wonderful year of athletics competition which was topped by the marvellous IAAF World Championships Beijing 2015.

The 2015 edition covers the top international results which were achieved between 1 January and 31 December 2015, in indoor and outdoor competition and also includes junior and youth lists. Every significant performance from around the world which made the season's top lists are contained on its pages. This of course includes those made during IAAF World Athletics Series events and the annual competitions of the various IAAF leagues, challenges and permit series.

Athletics is the number one sport of the Olympic Games. As we look forward to this year's Olympics, the statistical information provided in this annual will help athletes, officials, media and fans alike make an objective analysis of the likely contenders for honours in Rio.

Introduction

This fourteenth edition of the IAAF World Lists gathers the results achieved
from January 1st to December 31st 2015

Published for the first time in 1998 including the Outdoor Lists only, the IAAF Statistical Book has progressively included the Indoor and the Junior Lists in the 2000 edition and finally the Youth Lists in its 2003 edition. After an interruption in 2005 and the between 2010 and 2012 we came back for the 2013. We kept the same structure of the past editions for this 2015 edition also. A quick note regarding the categories: the IAAF Council decided to use U20 for Junior and U18 for Youth. From now on we will adopt the same criteria.

This edition gathers all the Lists daily compiled by the IAAF Statistics Office, with the precious help given by some external contributors.

General notes

We want to provide this book's readers with some further explanations that you will find hereunder.

First of all, we would like to draw your attention on the fact that the compilation is made according the traditional rules of any athletics compilation of results, but with a particular attention to the number of the "performances".
The lists have two levels:

- Performers: athletes will appear **once** with their **best** performance if it is within this limit.
- Performances: athletes will appear **every time** they record a performance within this limit.

A practical example: in the 100m, you can find **all the athletes** who ran in 2015 under regular conditions within the limit of 10.30.
All their results (**performances**) have been listed within the limit of 10.10. Within this limit, the same athlete can be displayed with many performances. From 10.11 to 10.30 athletes with their best time only.

We note that more and more credit is given to "rumours" raised by some performances. This is not the philosophy of the compilers of these lists. Our civil, sports and even - for some of us - legal education prevents us from making any unjustified statements without any evidence. Doubts on results, dates of birth or other aspects remain unchanged unless officially proven otherwise. In any case, we need "evidences" and not "rumours". For this reason, the compilers of the IAAF World Lists have never removed results which were quickly "sentenced". In case we are provided with reliable evidences of irregularity, we will remove the results from the lists daily published on the IAAF Website, under the

"**Records & Lists**" section. At the same time we ask information and clarification to the relevant Member Federations.
We would like to remind also that our criterion is considering "not confirmed" the results that the Member Federations send to the IAAF through the Online Event Entry System for which no official results have been received. If then these results are not confirmed by other sources, despite the researches of the compilers, it will be decided to remove them.

Finally, the issues related to athletes involved in doping offences. As in any Court judgement, these athletes have rights set by our Rules. First of all, the right to defend themselves or to appeal against a verdict and such procedures might take time. In such situations, these athletes remain in the IAAF Lists until the conclusion of the procedure and until a final decision is given by the relevant authorities. Once received these official documents, the names and performances are then removed from the lists.

World Records

Each List is preceded by its World Records (World Best Performances for U18) recognised by the IAAF (updated as at 25 February 2016). From 2013 onwards the IAAF recognizes two World Records for women in the Road Races: a World Record for performances achieved in mixed gender races and one for performances achieved in single gender races.

TOP Indoor Lists

The Indoor Lists 2015 only include, as always, the events recognised by the **Rule 263** (Events for which World Indoor Records are recognised). The number of results can differ according to the limits set by the compilers.

TOP Outdoor Lists

The Outdoor Lists 2015 include the events recognised by the **Rule 261** (Events for which World Records are recognised). The number of results can differ according to the limits set by the compilers.

TOP 50 U20 Lists

The U20 (previous indicate as Junior) Lists 2015 include the events recognised by the **Rule 262** (Events for which World U20 Records are recognised).

TOP 30 U18 Lists

This book also includes U18 Lists (previous indicated as Youth), lists which have been presented for the first time in the 2003 edition of the IAAF Book. The compilation of the Youth Lists is based on the following criterions:

• U18 athletes: the athletes belonging to this category in 2015 are those born in 1998-99-2000

• We only and exclusively publish the events scheduled at the IAAF World U18 Championships.

• Hurdles and throwing events: we only and exclusively publish the events with U18 hurdles and implements, in accordance with the IAAF Rules, i.e.:

Boys		Girls	
110h	0.914m	100h	0.762m
400h	0.840m		
SP	5 kg		3 kg
DT	1.5 kg		
HT	5 kg		3 kg
JT	700 g		500 g

• Combined events: we only and exclusively publish the performances achieved in accordance with the IAAF Rules for this category, i.e. Decathlon for men and Heptathlon for women, respecting the following order:

Decathlon: 1st day: 100m – LJ – SP 5 kg - HJ – 400m
2nd day: 110h 0.914m – DT 1.5 kg - PV – JT 700g – 1500m

Heptathlon: 1st day: 100h 0.762m – HJ – SP – 200m
2nd day: LJ – JT – 800m

We noticed that the Combined Events contested by U18 Athletes do not follow very often the IAAF Rules (single events are changed, the order is modified, hurdles and implements are not always regular for the age category): these results will not enter in the legal performances.

• Indoor performances are not included.

The compilation of the U18 Lists involves major difficulties because of:

• The great diversity of the events together with the use of hurdles and implements of different heights and weights.

• The lack of information coming from the National Federations regarding this specific category.

Moreover, all the Lists have been compiled by taking into account all the results we have been aware of, until the end of 2015.

Acknowledgements

Once again, we are very grateful to all those who - continually or occasionally – helped us with precious information coming from all over the world. Fortunately, in these last years, the information related to our sport underwent an exceptional acceleration thanks to the technological improvements. Today, most of the results are taken from many Federations or main organizers' websites.

But this acceleration also creates a "*Lists' stress*", with people often convinced that the results enter automatically the Lists just a few seconds after the end of the competition. Unfortunately, the compilation needs time, a lot of time, patience and many hours of dedication every day.

First of all, we would like to thank the Member Federations that help the IAAF Statistics Office by sending official results, lists, records and all kind of information.

Fortunately for our work, there are Member Federations discovering the usefulness of the statistical data and their number is growing progressively each year. However, there are still too many parts of the World that have not understood how important this work is for our sport and thus entire geographical area are not totally cooperative.

Our thanks also go to the numerous statisticians, journalists, organizers, athletes, managers, coaches and even the athletes' parents (!) who provide valuable information. Before their publication in our Lists, all these information are accurately checked and confronted – when possible - with official documentation. Last but not least, we thank all the simple fans of our sport for their constant interest to our work.

We particularly thank some external people who – with their great professionalism – gave a determining contribution to this IAAF book.

We can't forget the valuable help given by a few specialists on specific events, such as:

– **György Csiki** (National Records)

– **Gabriele Manfredini** (Combined Events).

Last but not least, we receive an important contribution thanks to the regular reports coming from some IAAF Areas statisticians or from the official web sites: Europe, Asia, Oceania, Central American and Caribbean, South America, Africa.

All the national reports we regularly received from many countries, compiled by people working inside or outside the Federations, are also very useful.

Our apologies to all the people we do not mention but that we want to thank in a unique and collective "*thank you*": in many countries, there are people giving a constant, friendly, priceless and disinterested help. This is still one of the great strength of our sport.

IAAF Website

This book is a static view of the World Lists' situation at the end the 2015 season, but our sport's compilations are a material in constant evolution. Technology gives a great help in order to amend, update and clarify doubts and situations. Thanks to this formidable possibility, potential mistakes or omissions - in this paper version - will be continually corrected on the statistics pages of our IAAF Website updated under the direct responsibility of the Statistics Office. Indeed, the IAAF World Records and the IAAF World Lists (Outdoor, Indoor, Junior and Youth) are daily updated on the IAAF Website and can be consulted anytime throughout the year.

World Lists, World Records, World Best Performances and Competitions Entry Standards are available under **Records & Lists** on the IAAF web site **www.iaaf.org.**

Amendments will be gratefully received by
Ottavio Castellini.
